**"Discover the World's Best Conditions
for the Aerospace Industry at Gyeongsangnam-do RIC"**

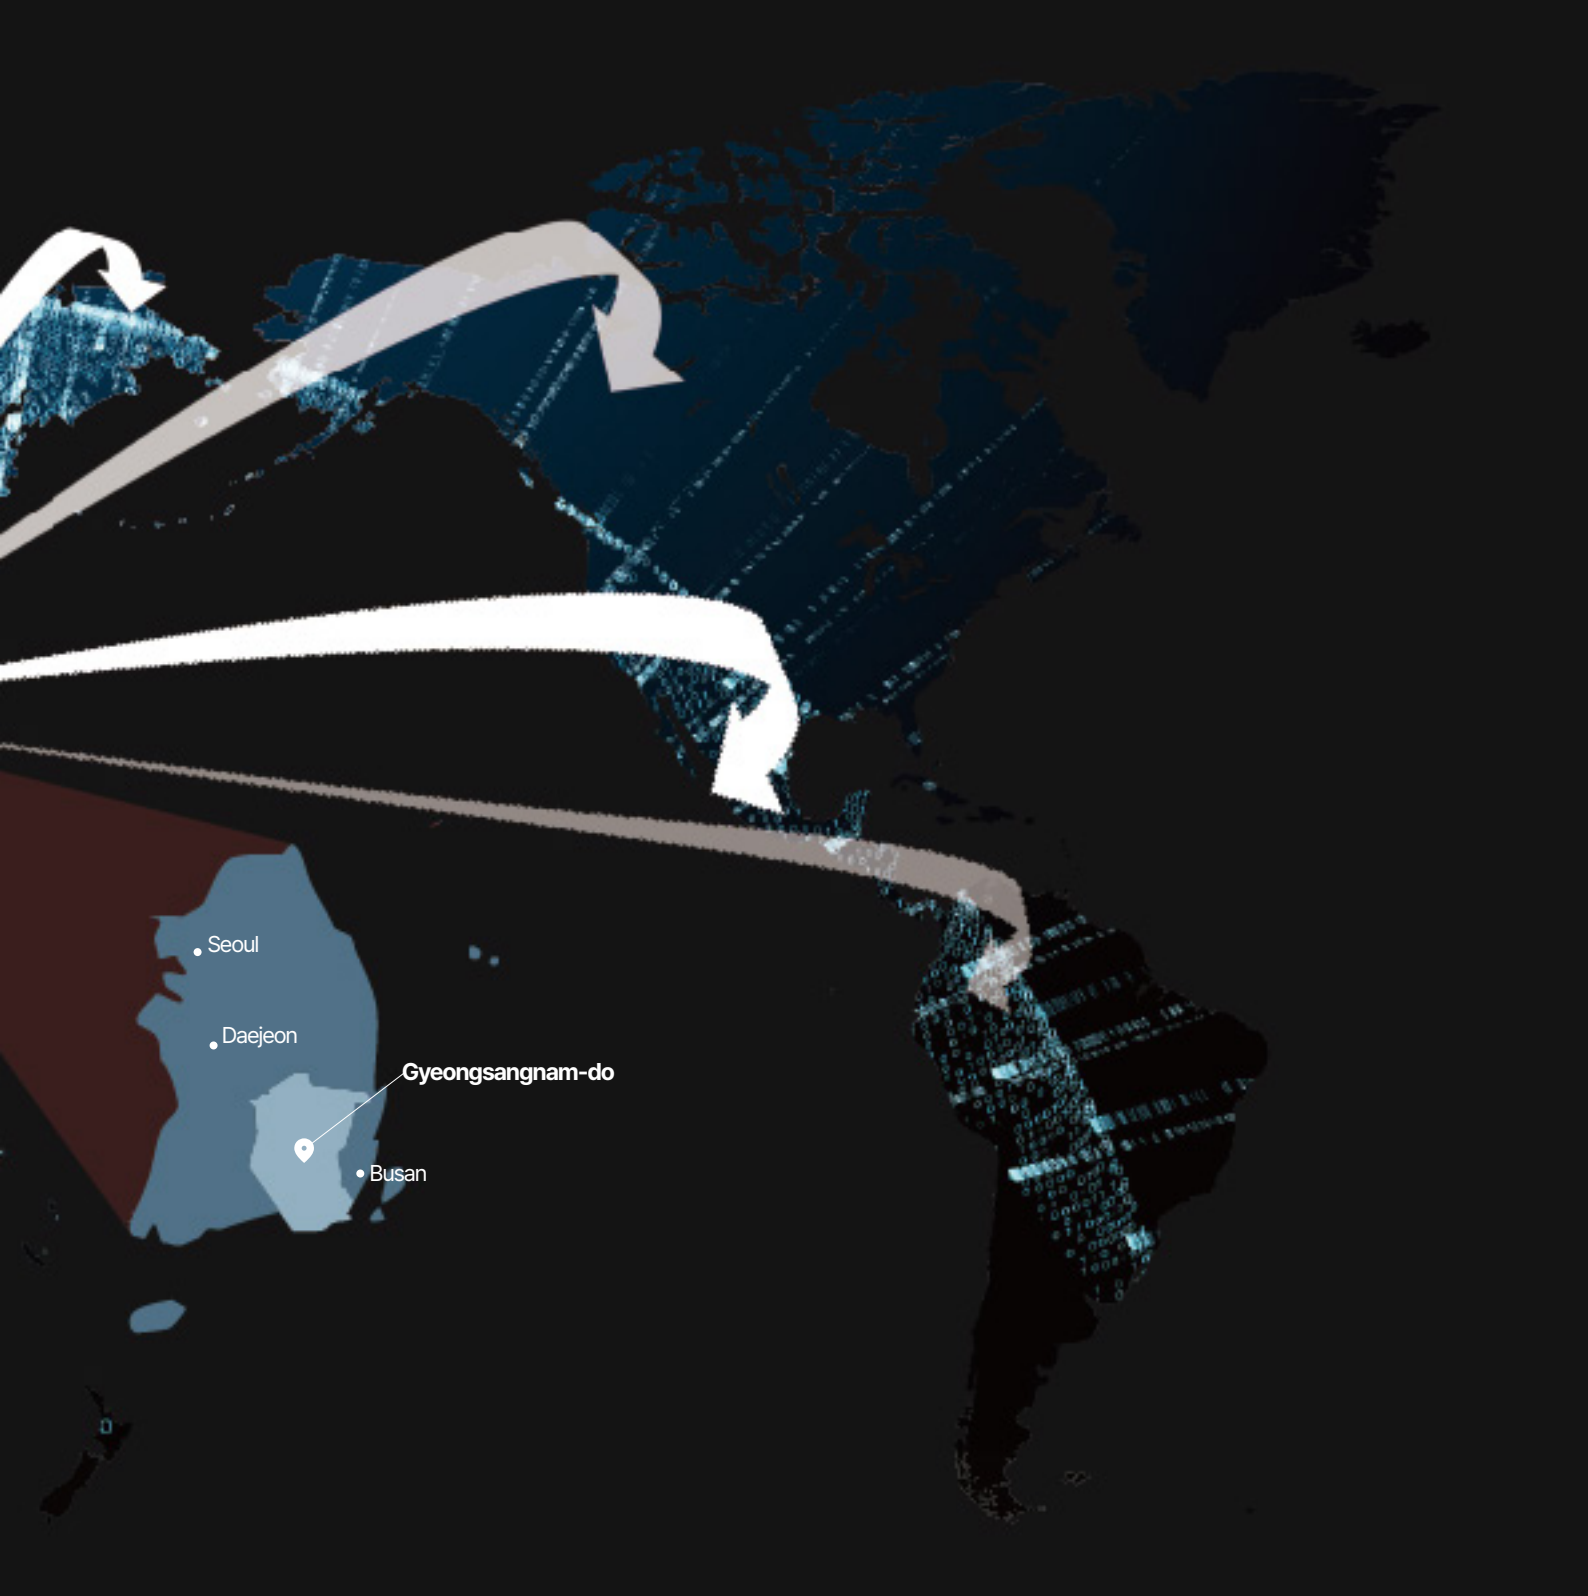

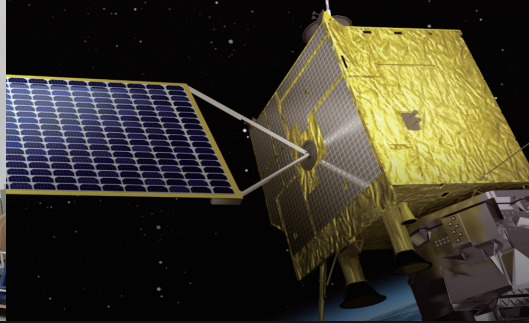

Gyeongsangnam-do RIC

Regional Innovation Cluster

The Gyeongsangnam-do Regional Innovation Cluster aims to establish an advanced, eco-friendly aircraft structural manufacturing innovation hub through the collaborative efforts of businesses, institutions, academia, and research organizations. It actively supports research and development in key technologies, strengthens aerospace networks, nurtures talent, facilitates commercialization, promotes global collaboration, and operates autonomous programs.

In May 2024, the Korea AeroSpace Administration (KASA), a government organization, was established in Gyeongsangnam-do, which is now fostering a "Global Aerospace Component Manufacturing Leading Cluster." Its goal is to become the world's leading hub for the aerospace component and materials industry.

Opportunity

The Gyeongsangnam-do Regional Innovation Cluster (Gyeongsangnam-do RIC) in South Korea offers a unique opportunity to ensure your business's success. The cluster embodies the strength and precision of a manufacturing powerhouse while fostering a spirit of collective support and unity.

The entire nation, committed to mutual success, welcomes you with open arms.
