The Gyeongnam National Innovation Cluster aims to establish a cutting-edge, eco-friendly aircraft structural manufacturing innovation cluster, through the collaborative efforts of businesses, institutions, schools, and research institutes. It provides active support for research and development in key technologies, strengthens the aerospace network, fosters talent, facilitates commercialization, promotes global collaboration, and operates autonomous programs.

Opportunity

The opportunity to make your business a success awaits you in the Gyeong-sangnam-do Regional Innovation Cluster of South Korea(Gyeongnam NIC). The cluster embodies the strength and precision of a manufacturing powerhouse, where the spirit of shared joy and sorrow resonates. The entire nation, with a commitment to supporting one another as if it were their own, welcomes you.

Major Agency of Gyeongnam NIC

Growth

From R&D, prototype manufacturing, certification, marketing, education, to consulting, a network of partner organizations and experts is ready to support your growth, right from the beginning to the end. They have been waiting for you at Gyeongnam NIC for over a decade, offering their expertise and resources to assist you every step of the way.

Enhance

The conditions to enhance your business competitiveness are already abundantly available here. Building upon the concentrated strength of Gyeongnam NIC, you can further strengthen your business competitiveness by engaging and collaborating with various companies within the cluster. With limitless potential, you can leverage the resources and expertise within the NIC to take your business to new heights.

Boundless expansion

With globally renowned aircraft series like the T-50/-FA-50, KT-1, KC-100, KUH, LCH/LAH, and the upcoming KF-X, along with the KSLV-II(as known as "Nuri-ho"), South Korea has already positioned itself among the leading nations in the aerospace industry. Engaging in business within the Gyeongnam NIC, the ultimate production hub for these remarkable achievements, is akin to boundless expansion for your enterprise. Moreover, it presents you with fresh opportunities that will captivate potential investors.

KSLV-II
